Food Preparation & Nutrition Yr7 Food – Term 2/ Spring

The Eatwell Guide

The Eatwell guide shows the types and proportions of foods we need to eat to have a healthy diet.

Most foods, such as pizza, casseroles and pasta dishes contain food from a number of the food groups. These are

known as **Combination Foods**.

The ingredients of these dishes need to be checked and fitted into the different sections on the guide to help achieve a balanced diet.

Nutrients

Nutrients are the substances in food that give the nourishment that is vital for growth and the maintenance of life. Most foods contain a number of different nutrients in varying amounts but some foods are known as rich sources of a particular one. Nutrients have different functions in the body.

| Nutrient | Function |
|--------------------|--|
| Protein | Growth, repair of body cells and maintenance |
| Carbohydrate | Energy |
| Fat | Warmth and protection of major organs. Concentrated store of energy |
| Vitamin & minerals | To keep the body healthy |

| Name of the Nutrient | Sources | Function | |
|---|------------------------------------|---|-------------|
| Carbohydrates (energy giving food) | Rice, potato, wheat, sugar | Provides energy | o line |
| Fats (energy giving food) | Butter, ghee, milk, cheese | Gives more energy compared to carbohydrates | |
| Vitamins and Minerals (protective food) | Fruits and vegetables | Required for normal growth and development | ** * |
| Proteins (body building food) | Milk, eggs, meat, fish, soybean | Helps in building and repair of body | |

| Salt | 0.3g or less | 0.31g - 1.5g | More than 1.5g |

Water is Vital

Water is not a nutrient, but it is essential for life. Our bodies are 70% water, and it is an important component of blood, digestive juices, urine and perspiration.

Water is needed for:

- Chemical reactions in the body
- transport nutrients, oxygen and carbon dioxide around the body
- to regulate body temperature
- to help get rid of waste products in our urine and faeces.

| 1 to 3 = Healthy urine | | 4 to 8 = Unhealthy urine | | | | | |
